Dear Ms. Stevens,

Thank you for your correspondence on behalf of the Silver Spring Citizens Advisory Board conveying suggestions for developing safe-street-level access to the new Silver Spring Library. I apologize for the delay in responding to your correspondence. I distributed your correspondence to Councilmembers when I received it.

The Silver Spring Citizens Advisory Board raises important considerations regarding access to the new Library for pedestrians and transit users and developing a safe and welcoming street level crossing at the intersection at Wayne Avenue and Fenton Street. Councilmembers, too, have expressed concerns about traffic and pedestrian safety at the intersection in discussing the Silver Spring Library project.

The Council appreciates your recommendations and is copying Executive Branch staff in this correspondence to requesting consideration of them. The Council will continue to monitor developments related the street-level access to the library as the project moves forward.

Please feel free to follow up with any concerns you may have. We appreciate your thoughts.

Sincerely,

A handwritten signature in black ink, appearing to read "Roger Berliner". The signature is fluid and cursive, with the first name "Roger" and last name "Berliner" clearly distinguishable.

Roger Berliner
Council President
